Shorttrack club Kristallijn Gent donates padding

Shorttrack club Kristallijn Gent donated their old padding to the Oberstdorf Shorttrack Summercamp as they have received a complete new set of padding of international standard for the Icerink in Gent. Thanks to this support of STKG the problem of enough padding and the safety in training and competition of the Oberstdorf Shorttrack Summercamp is solved now. The club, of which many members every year come to the Oberstdorf Shorttrack Summercamp has a new boarding padding in Gent now and they decided to donate the old padding (still in good quality) to the summercamp. In the week before the summercamp 2020 a truck with driver from Oberstdorf came to Gent and all the STKG members were helping to load the van. On behalf of all participants of the summercamp we would like to thank STKG for their support.

The past seasons the summercamp of Oberstdorf became bigger and bigger and also the number of training sessions were expanded with the last years even training on two ice rinks at the same time. For training at two ice rinks at the same time the padding of Oberstdorf was not enough in number of meters. For this reason every year padding was borrowed from the Ice rink of Munich. To collect this every year from Munich and bring it back after the summercamp was always a lot of work for transport from and return with a rented big truck.
